

Meridian Consulting Group

Generated on: July 26, 2026

This report presents four key workforce and financial performance indicators, highlighting consultant efficiency, practice-level revenue contribution, seniority-based pricing structure, and overall engagement pipeline health, offering leadership a consolidated view of operational and financial performance to guide staffing and strategic decisions.

Consultant Utilization Rate

Consultant	Utilization %
Jordan Reeves	100.0%
Priya Nambiar	66.3%
David Chen	49.0%
Anika Patel	38.4%
Tomas Herrera	35.6%
Marcus Webb	27.2%
Rachel Kim	25.6%
Lena Kowalski	14.4%

This table tracks Consultant Utilization Rate, showing what percentage of each consultant's logged hours are billable to clients. Consultants are ranked from highest to lowest utilization, giving a clear view of who is driving revenue most efficiently. This ranking helps leadership identify top performers for recognition or expanded client work, while flagging underutilized consultants who may need better project allocation, training, or staffing adjustments.

Revenue Generated by Practice

Meridian Consulting Group

This chart on Revenue performance by practice explains where the firm's billable income is concentrated. Strategy leads all practice areas with \$46,836 in revenue, representing 35% of the firm's \$135,734 total. On average, each practice contributes \$27,147, highlighting an uneven distribution of billable income across service lines.

Average Billable Rate by Level

This chart on Pricing & rate strategy explains how billing rates vary by role. Meridian's average billable rate scales consistently with seniority, ranging from \$152 at the Junior level to \$425 at the Partner level. This \$273 spread reflects the firm's tiered pricing structure, with Partners commanding a premium consistent with their seniority and client-facing expertise. The average rate across all levels stands at \$281.

Meridian Consulting Group

Engagement Status Distribution

This chart on Pipeline health & risk exposure explains how engagements are distributed across lifecycle statuses. Currently, 16.2% of engagements are Active and 18.9% are Completed, while 32.4% sit On Hold and 32.4% have been Cancelled. The combined At Risk share (On Hold + Cancelled) stands at 64.8%, offering a quick read on how much of the pipeline may need attention. On Hold represents the largest segment at 32.4% of all engagements.
